YokedShiba Woofpaper

YokedShiba - Community Driven

YokedShiba is a dog-themed community token designed to bring the famous Swole Doge meme to the Binance Smart Chain. Our goal is to be a 100% community-driven project. In addition, our roadmap includes various milestones, such as reaching a certain number of followers on our Telegram and Twitter and of course more ambitious milestones. However, before we reach this point, we still have a long and difficult road ahead of us.

Without you, the community, we don't even have a chance to get there. So we hope you follow us along the path to success, fellow YokedShibas!

The Yokenomics

Initial Yokenomics

Since one of the core aspects of the project is to be community-driven, instead of an unfair pre-sale, 98% of the total supply is invested in initial liquidity, and only 2% is kept in the development wallet. Since these initial tokens were funded by personal funds, there was initially only a liquidity pool worth 2 BNB. In order to prevent anyone from acquiring all the tokens at once, the upper limit of each transaction of the contract is .05% of the supply for the first 10 minutes of trading (500), after this the limit will be increased to 1% (10 000) to allow for faster growth.

Another problem is that the pool will eventually run out of liquidity, so automatic liquidity fees are built into the contract.

Lastly, but more importantly, as a true community-driven token, we've decided to redistribute 7% (!) of each transaction to YokedShiba holders to reward and thank them for accompanying us on this journey.

Summarized, the following fees are applied to each transaction:

🤑 7% Redistribution

💹 4% Automatic LP Generation

♻️ 5% Marketing

Future Yokenomics

However, all these fees and transaction limits can be changed after the initial launch in order to accommodate the wishes of our token holders

At the beginning of our long adventure, we mainly need liquidity. The 4% Automatic LP Generation will help us stabilize the token price and actually ensure an ever-rising price floor due to the taxes on both buys and sells. The marketing fee is also only meant to be there at the start, to get YokedShiba out into the world. Once the project proceeds, it's very likely that only the burn fee will be left.

In the long run, we would like to change the fee structure to:

🤑 7% Redistribution

💵 0 to 2% Automatic LP Generation

🔥 1 to 2% Burn

This would make YokedShiba both deflationary and usable with only a 10% fee total which only benefits the YokedShiba community.

Because of all these plans mentioned above we won't be renouncing ownership of the contract as that would lock us out of changing the fee structure in the future. However, once we have evolved to a definitive fee structure, ownership of the contract by the team is no longer needed and, should the community request so, the contract can be renounced.

The Roadmap

As a true community token, it is up to the community to decide which direction YokedShiba will take. The following suggestions have been made already by some of our dedicated members:

- A dashboard-website including widgets which would display the contents of your BSC/KCC/... wallet
- A tipping bot in true Doge meme fashion
- Sponsoring a racing team like Doge did with NASCAR

The main idea is to decide the goals and roadmap of the token in true DAO fashion. Autonomous, decentralized and as instructed by the YokedShiba community.

In order to grow the YokedShiba, short term goals have already been defined by the YokedShiba team:

🦴 Organically grow the Telegram community to 5.000 members 🦴

🦴 Reach 10.000 YokedShiba holders 🦴

🦴 Ensure the community actively engages and participates on the YokedShiba socials (Twitter, Telegram) 🦴

🦴 Encourage community members to build project etc in the name of YokedShiba with the help of the community 🦴

🦴 Apply to (multiple) dexes in order to get our own farms/pools on BSC 🦴

🦴 Do something fun and cool with the project, e.g. sponsoring a sports/racing team or a charity 🦴

🦴 Become the number 1 dog meme token on the BSC 🦴

🦴 Obligatory: listing on CoinGecko and CoinMarketCap 🦴

The Team

The is composed of... YOU! Every holder of YokedShiba is part of the team and part of the community. In the end, our only goal is to create a community that will grow to become the biggest community driven token on the BSC Chain will having fun and giving everyone an equal chance to participate in our project.

This is also the reason why this token starts as a fair launch, we want to level the playing field for everyone willing to join us in our adventure to the top.

YokedShiba was founded by a tight-knit Discord community looking to finally create a fair community token on the BSC Chain.
